(54) PIMPLE THERAPEUTIC AGENT

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a therapeutic agent for treatment of pimple by including a phosphoric diester compound as an active ingredient.

SOLUTION: This therapeutic agent contains a phosphoric diester compound (salt) of the formula (R1 and R2 are each H or methyl) (e.g. L-ascorbic acid, DL- α -tocopherol phosphoric diester potassium salt). The dose of the compound of the formula is about 10-1,000mg/adult at a time (to be administered several times a day) for internal use, while containing about 0.01-10w/w of the compound in the case of ointment. The compound of the formula can be used advantageously for pimple therapy because of being extremely low-toxic and excellent in safety.
